THE TRUE DIGESTIVE FLUID OR, GASTRIC JUICE.

Propared from Renner, or the fourth Stonage of the Ox, after directions of Beaon Leanno, the great Physiological chemist, by J.S. Howarson M. D. Philad Iphia, Fennsylvania.

This is a truly wonderful remedy for Indigestion Dyspopsia, Juandice, liver complaint, constipation, and Doblitty, curing after Nature's own mothod, by Nature's own Agent, the Gastrie Julea.

in about two hours, out of the stomach.

PEPNN is the chief element, or dreat Digesting Principle of the Gastrie Juice—the solvent of the Food, the Purifying, Preserving, and stimulating Agent of the stomach and Intestines. It is extracted from the digestive stomach of the Ox, thus forming an Artificial Digestive Fluid, precisely like the matural Gastric Juice in its chemical powers, and furnishing a complete and perfect substitute for it. By the aid of this pr. paration, the pains and evils of indigestion and dyspepsia are removed, just as they would be by a healthy stomach. It is doing wonders for Dyspeptics, curing cases of Debility, smariation, nervous decline and dyspeptic communition, supposed to be on the verge of the grave. The Scientific evidence upon which it is bessed, is in the highest degree curious and remarkable.

SCIENTIFIC EVIDENCE!

BARON IEBIG in his celebrated work on Animal chemistry, says: "An Artificial Digestive Fluid, analogous to the Gastric Juice, may be readily prepared from the mucous membrane of the stomach of the Calf, in which various articles of food, as meat and eggs, will be softened, changed and digested just in the same manner as they would be in the human stomach."

Dr. COMBE, in his valuable writings on the "Physiology of Digestion," observes that "a diminuition of the duo quantity of the Castric Juice is a prominent and all prevailing cause of Dyspepsia;" and he states that "a distin mished professor of medicine in London, who was severely afflicted with this complaint, finding everything else to fail, had recourse to the Gastric Juice, obtained from the stomach of the fanons works on "Vegetable Diet," says: "It is a renearkable fact in physiology, that the tomachs of snimals, macurated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wises I I event from the natural digestive process."
